SUMMARY

Full Stack Web Developer focused on building production-ready applications with Angular, ASP.NET Core, C#, and SQL Server. Experienced in REST API development, authentication flows, SQL optimization, real-time updates, and clean full-stack delivery across SaaS, AI/document, and operational platforms.

WORK EXPERIENCE

Back End Developer Intern - CodeSoft Solutions

Feb 2026 - May 2026

- Developed RESTful API endpoints using ASP.NET Core Web API and C# for client-facing modules, improving backend reliability and integration quality.
- Optimized Microsoft SQL Server queries and stored procedures, improving API response time by ~30% on high-traffic workflows.
- Integrated backend services with Angular modules, participated in Agile sprints and code reviews, and followed clean coding practices.

PROJECTS

HireFlow - Recruitment Pipeline SaaS [GitHub](#) | [Live Demo](#)

Jun 2026

ASP.NET Core 8, EF Core, SQL Server, Hangfire, Angular 20, Tailwind CSS, DaisyUI, Angular Signals

- Built a full-stack hiring platform with Kanban pipeline, recruiter/candidate access, interview scheduling, analytics dashboard, and seeded demo data.
- Implemented JWT + TOTP authentication, RBAC, background jobs, and Clean Architecture / Repository Pattern for maintainable backend services.
- Created a responsive Angular UI with modular screens for candidate tracking, recruitment workflows, and role-specific user journeys.

InsightFlow - AI Document Intelligence Platform [GitHub](#)

Jun 2026

FastAPI, HuggingFace BERT, Angular 20, ASP.NET Core, SQL Server, RAG Pipeline

- Developed document workflows for upload, summaries, semantic search, and Q&A over uploaded content using embeddings and retrieval-based response flow.
- Designed a microservice-style ingestion pipeline with preprocessing, backend APIs, and Angular-based interaction for document insights and dashboards.

SignalOps - Incident Management Platform [GitHub](#)

Nov 2024

ASP.NET Core, Razor Pages, SQL Server, SignalR, Hangfire

- Built a PagerDuty-inspired incident workflow with real-time alerts, on-call notifications, escalation tracking, and SQL Server-backed incident records.
- Used SignalR for live updates and Hangfire for background escalation jobs, reminders, and scheduled operational tasks.

MiniMunch - Premium Pancake Ordering SPA [GitHub](#)

2025

Angular 21, TypeScript, Tailwind CSS, SCSS, Angular Signals, IntersectionObserver

- Built a polished pancake ordering SPA with cinematic hero section, interactive menu builder, cart flow, responsive layouts, and premium UI sections.
- Used Angular Signals, Tailwind CSS/SCSS, and IntersectionObserver scroll reveals to create smooth frontend interactions and a modern user experience.
