Amritpal Singh

Back End Developer at CodeSoft
Greater Delhi Area

Summary

I'm a B.Tech CSE Graduate and Full Stack Developer working primarily with Angular, ASP.NET Core, and SQL Server. What I actually enjoy: Full-stack architecture — frontend to backend to database Security & auth systems (JWT, RBAC, OAuth). Turning messy data into usable insights. Some things I've built: SignalOps — real-time monitoring for APIs, SQL Server, TCP ports. Skills: C# · ASP.NET Core 8 · Angular · TypeScript · SQL Server · Node.js. Currently looking for: SDE / Full Stack Developer Roles. If you're hiring, building, or just want to talk shop — let's connect. — Amrit Pal Singh github.com/gitamrit1443

Experience

CodeSoft

Back End Developer

February 2026 - May 2026 (4 months)

- Developed and maintained RESTful API endpoints using ASP.NET Core Web API and C#, contributing to production-level backend services consumed by client-facing applications
- Optimized Microsoft SQL Server database queries and stored procedures, reducing average API response time by ~30% on high-traffic endpoints
- Integrated backend services with Angular frontend modules, ensuring seamless full-stack data exchange and improved user workflow efficiency
