SUMMARY

Full Stack .NET Developer with internship and project experience building and deploying ASP.NET Core Web APIs, Angular applications, and SQL Server-backed systems. Reduced API response times by ~30% and developed production-style SaaS, document-intelligence, and incident-management platforms using C#, EF Core, JWT/RBAC, SignalR, Hangfire, and Azure.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Python

Frontend: Angular, RxJS, Tailwind CSS, HTML5, CSS3, SCSS

Backend: ASP.NET Core, Web API, EF Core, LINQ, ADO.NET, SignalR, Hangfire, Fastapi

Databases, Cloud & Tools: SQL Server, PostgreSQL, Azure, Railway, Vercel, Git, GitHub, Postman

WORK EXPERIENCE

Software Engineer — VMR Vision, Dehradun

Jan 2026 – Sep 2026

- Designed, developed, and maintained full-stack CRM applications using C# and ASP.NET.
- Engineered robust web scrapers for automated data extraction utilizing C# and Playwright.
- Architected SQL Server databases and optimized backend performance using Stored Procedures.

Backend Developer Intern — Cynoteck Technology Solutions

Feb 2025 – May 2025

- Built and integrated RESTful ASP.NET Core Web API endpoints in C# for client-facing modules, applying OOP and clean-code practices to strengthen service reliability and frontend integration.
- Reduced API response times by ~30% on high-traffic workflows by optimizing SQL Server queries and stored procedures with ADO.NET and LINQ.
- Connected backend services with Angular modules and contributed through Agile sprints, code reviews, debugging, and cross-functional collaboration.

PROJECTS

AI Interview Coach — Interview Practice Platform — GitHub

Sep 2026 – Present

- Developing modular ASP.NET Core APIs for authentication, user profiles, and interview sessions, with clear service separation and RESTful design.
- Translating a mobile Figma design into a responsive Angular SPA using signals, inject(), and standalone components for maintainable frontend architecture.

HireFlow — Recruitment Pipeline SaaS — [GitHub](#) | [Live Demo](#)

May 2026 – Jun 2026

- Engineered a full-stack recruitment SaaS with Kanban candidate tracking, role-specific recruiter/candidate workflows, interview scheduling, analytics, and seeded demo data.
- Secured the platform with JWT, TOTP-based two-factor authentication, and RBAC; automated background workflows using Hangfire.
- Deployed the API, database, and frontend across Azure, Railway, and Vercel to demonstrate an end-to-end production-style architecture.

InsightFlow — AI Document Intelligence Platform — [GitHub](#) | [Live Demo](#)

Apr 2026 – May 2026

- Built document upload, summarization, semantic search, and retrieval-based Q&A workflows using embeddings.
- Designed an ingestion pipeline for preprocessing and indexing uploaded content, exposed through backend APIs.
- Integrated Angular dashboards with the retrieval pipeline to present document insights and search results.

SignalOps — Incident Management Platform — [GitHub](#) | [Live Demo](#)

Oct 2024 – Nov 2024

- Engineered a PagerDuty-inspired incident workflow with real-time alerts, on-call notifications, escalation tracking, and Azure SQL persistence.
- Used SignalR for live status updates and Hangfire for scheduled escalation jobs across the incident lifecycle.
- Resolved EF Core migration and Azure SQL firewall issues and reviewed 60+ files through static analysis to improve deployment readiness.

EDUCATION

Graphic Era Hill University, Dehradun

May 2022 – Jul 2026

B.Tech in Computer Science and Engineering

CERTIFICATION

Azure Cloud Services — Coursera

Jun 2025

Credential ID: 4H7P4ZN44QF0 | Application Deployment, Cloud Computing, Azure Services
